

TACKLING CARDIOVASCULAR DISEASE IN SCOTLAND

2016

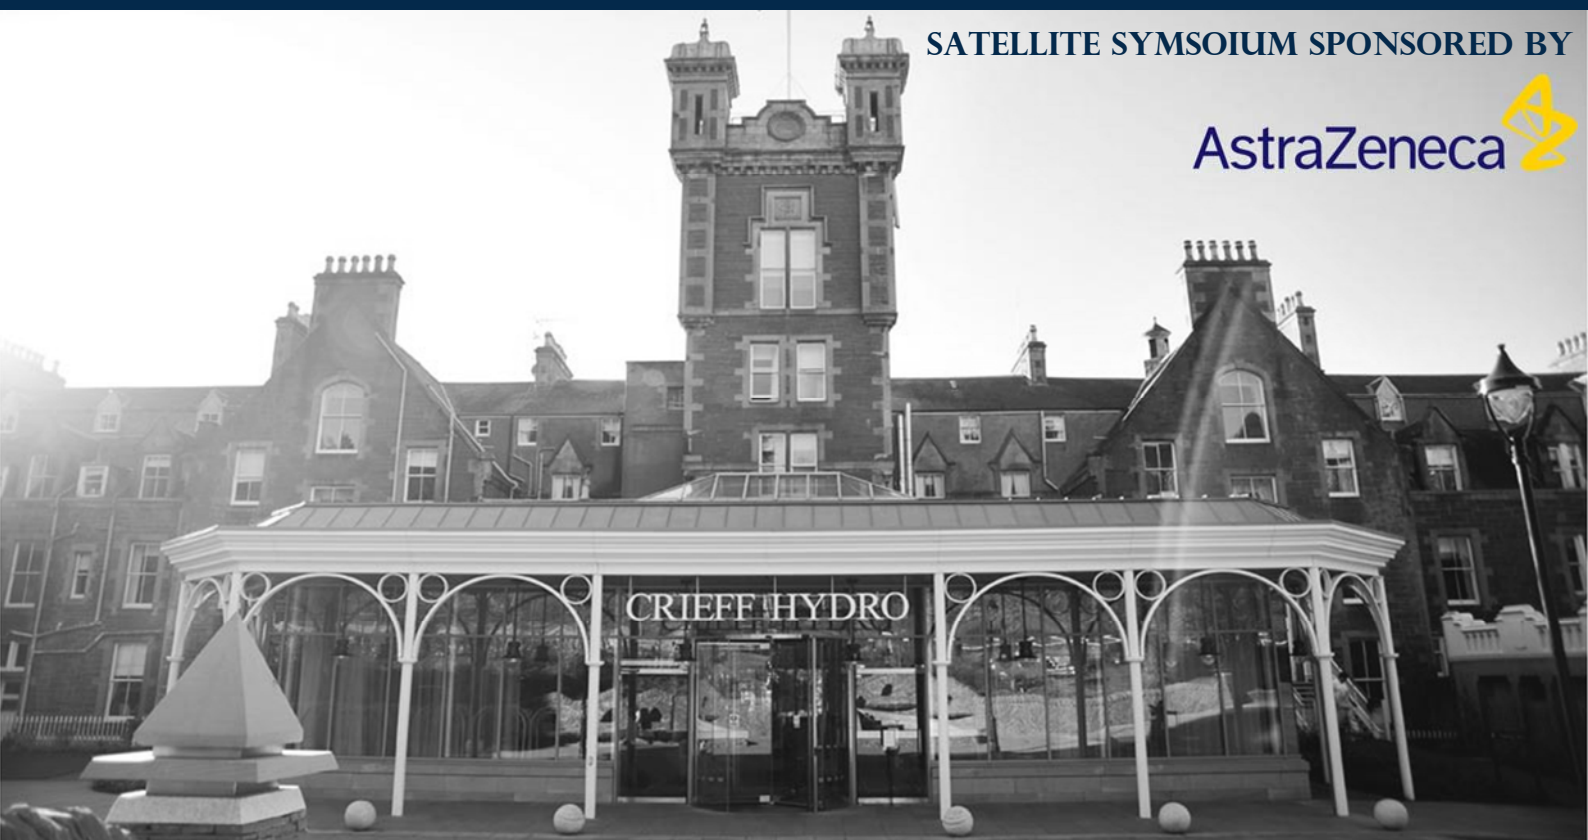

NOVEMBER 24/25

SHARP  
ANNUAL SCIENTIFIC  
MEETING

 CRIEFF HYDRO HOTEL

SATELLITE SYMPOSIUM SPONSORED BY

AstraZeneca 

### **“CORONARY ARTERY DISEASE - THE MANAGEMENT JIGSAW”**

Join us this year at this exciting new location while our usual venue is refurbished.

The programme covers all aspects of coronary artery disease management with keynote speakers on the burden of disease in Scotland, the impact on primary and secondary care services as well as the future management of coronary artery disease. We will have interactive workshops which will have a practical approach to improving skills in the management of chest pain, breathlessness, ecg interpretation, clinical skills and the use of cardiac medication.

Speakers include Prof Craig Whyte from Scottish Government, Professor Keith Oldroyd, Professor Ahmet Fuat, Professor David Newby, Dr Alan Japp, Dr Coin Stirrat, Miss Emily Woodcock and Mr Iain Speirits.

Our satellite meeting will cover cardiovascular risk, treatment, interaction between ambulance services and general practice in management of Acute Coronary Syndromes in primary care and new changes to cardiac rehabilitation in Scotland. Speakers include Professor Chim Lang, Dr Stuart Hutcheon, Mrs Frances Divers and Mr Paul Kelly.

This meeting offers an extensive programme which will be of interest to all specialist and health care professionals involved in heart disease in Scotland. There is no increase this year in the cost of attending which includes registration, two lunches, dinner and overnight accommodation as required. A full programme and booking form will be distributed in mid August 2016.
