## SHARP

**SHARP is a registered Scottish charity founded in 1988 by clinical staff to tackle the problem of premature illness and death due to cardiovascular disease in Scotland.**

Our activities include education, raising awareness of arterial disease and its management as well as clinical research. SHARP membership is open to all clinical staff especially those with an interest in cardiovascular disease and associated conditions.

By joining our group you will:

- Support the work of SHARP
- Become part of an active multi-disciplinary community
- Receive invitations to attend educational meetings
- Help raise the profile of research
- Receive information and news about related topics
- Network with professionals across care settings involved in arterial disease risk prevention

For more information or to join SHARP please visit our website: [www.sharpScotland.org.uk](http://www.sharpScotland.org.uk)

### Cardiovascular disease is a major cause of ill-health and death in Scotland.

In 2015 it was estimated that 670,000 of adults had a cardiovascular condition and was the cause of a quarter of all deaths. (SIGN 2017).

### Most of this is preventable if risk factors are picked up early and lifestyle changes made.

The efforts and resources of SHARP are directed towards both education and research.

Educational facilities are provided for health professionals to assist doctors and nurses identify those at risk and help them reduce their risk of developing these diseases.
